

SHU 10 SLi

SMALL WATER HEATERS 5 TO 15 L

PRODUCT-NO.: 229473

The small water heaters SHU..SL with 5 or 10 litres capacity are ideally suited to the supply of several draw-off points. The device temperature can be infinitely adjusted between 35 °C and 82 °C at the rotary selector. The thermal cut-out provides a permanent, safety-first maximum water temperature. This can be set to 38, 45, 55 or 65 °C. A signal indicator lights up each time the device is in its heat-up phase. In combination with the safety assembly SVMT, any pressurised tap can be connected.
